### Forged ball valves

Forged ball valve: Forged steel floating ball valve has better sealing and property than cast floating ball valve. Its better material property could make pipeline cut off or not with longer service.

WINDMILL different design with casted type could make forged floating ball valve has longer service, also Windmill advanced equipments could ensure touch the target.

forged trunnion mounted trunnion ball valve have much better property than the casted specified in high pressure. When high pressure extreme environments, only Windmill forged material trunnion ball valve could bear such as 2500LB. WINDMILL forged trunnion ball valve are welcomed by our clients, carbon, stainless steel and duplex stainless steel material could be used.
